

# Boreholes and measurements affected by errors

The Table 0.1 lists the hydro-IDs of the boreholes that were discarded in the screening process because affected by errors.

From the Table 0.2 on, the erroneous measurements are listed. The tables are structured with the second column listing the Hydro-IDs of the wells whose measurements within the time interval indicated in the first column are considered incorrect and therefore removed from the data sample.

The measurements removed using the "rmoutliers" command have not been listed.

Hydro-ID
